SUBJECT INDEX - VOLUME 46

Acid Rain, changes in poultry litter toxicity 167
Acetone, effect on crab development 185
Air, Chernobyl effects in Spain 14
  chlorpyrifos in houses 686
  drift of pesticide mixtures 829
  PAHs in atmosphere, Mexico City 690
  solvent contamination 1
Aldicarb, toxicity change with pH and temperature 197
Alachlor, dissipation under vadose zone conditions 519
Aldrin, impact on alkaline phosphatase in prawn 479
Alkane, toxicity to trout 173
Alkylhalide, toxicity to trout 173
Aluminum, blood levels and water intake 554
  effect on growth of Anacystis nidulans 720
Aminonicotinamide, synergism, antagonism w/carrier solvents 625
Ammonia, metabolism after trichlorfon exposure 731
Antibiotic, production by marine algae 329
Argemone oil, biochemical toxicology 422
Aromatics, utilization by Bacillus pasteurii 591
Arsenic, metabolism and speciation in humans 53
Atrazine, determination in soil 30
  growth response of algae 223
  inhibitory effect on dihydrotestosterone receptor, rat 92
  persistence in soil 22
  perspiration and fabic transmission 837
  soil particulates and fabric transmission 845
Azinphosmethyl, drift during orchard application 829

Benzene, effect on cellular and humoral immunity 937
  human exposure 1
Benzo(a)pyrene, effect on isopod growth 134
BHC, toxicity change with pH and temperature 197
Bioassay, atrazine in soil 30
  earthworm burrowing and AChE activity 859
  enhancement of liver cancer with CCl_4 in trout 879
  foliar mass to area conversion, grapes 542
  for ecological control 387
  immunosorbent assay for trifluralin 404
  microtox for toluenes, anilines 550
  neutral red uptake inhibition for fish mortality 649
  nucleosides in blood of fish with tumors 713
  pesticides on leaf surfaces 397
  planarian neurobehavioral bioassay 866
  sorbent disks for pesticides in leachate 512
  standard test fish, India 871
  toxicity with nanoflagellates 193
  ultraweak luminescence from fish 456
  zebra fish vs. trout for toxicity 641
Bromacil, movement in waste site 284
BTX, transport in groundwater 534

Cadmium, $CdCl_2$ and protein metabolism in crab 583
  Cd sulfate neurobehavioral toxicity 727
  dietary intake, Spain 320

Cadmium, effect on photosynthesis and electron transport 146
induced lipid peroxidation, rat 929
inhibition of cell migration 230
in shorebirds and prey near copper mine 242
interaction with Fe in intestinal tract 263
soil, produce near smelter, Canada 790
Carbamate, metabolism by soil bacteria 380
Carbaryl, AChE activity and burrowing in earthworm 859
determination in honeybee 654
effect on pheasant and partridge 113
fate in soils with pH 374
perspiration and fabric transmission 837
soil particulates and fabric transmission 845
Carbofuran, effect on pheasant and partridge 113
Carbon tetrachloride, liver cancer in trout 879
Chernobyl, short and medium term effects, Spain 14
Chlordane, in human blood 670
Chlordane, superoxide degradation at low temperature 292
Chlorophenoxy herbicide, extraction of four from surface wipes 392
Chlorothalonil, residues in apples and pears 361
transport from use site 822
Chlorpyrifos, analysis in technical formulations 313
exposure of workers reentering corn 343
fertilization and plant metabolism 705
in air and soil of houses 686
Chromium, bioavailability from encapsulated pigments 271
hexavalent chromium and hematology 761
Clothing, pesticide transmission 697
Copper, Cu(II) & bis (glycinate)-Cu(II) uptake 466
metallic Cu effect on Ceriodaphnia 141
peripheral blood effects in Barbus spp. 606
sequestration after Pb exposure 894
soil, produce near smelter, Canada 790
uptake by Halimione portulacoides 442
Copper nitrate, effect on Ceriodaphnia 141
Cyanide, production from nitriles 431
Cyclophosphamide, effect on cellular and humoral immunity 937

DDT, in human milk and serum 797
in human serum and whole blood 803
in Mytilus edulis 179
increased contraction in uterine strips 751
transfer to young fish 745
Deoxynivalenol, diet toxicity to chickens 410
Dermatitis, from contaminated slip 69
Diazinon, turf application and death of geese 852
Dieldrin, effect on biochemistry of toad embryo 633
transfer to young fish 745
Dimethoate, persistence in three soils 492
effect on pheasant and partridge 113
Drugs, effect of nitrogen compounds on hexobarbital sleep 108

Endosulfan, bioconcentration in aquatic organisms 151
Ephemeroptera, concentration of Cd, Pb, Cu, Zn in larvae 901
Esfenvalerate, deposition on Brassica vegetables 810

Fabric, perspiration and pesticide transmission 837
soil particulates and pesticide transmission 845
Fenitrothion, contamination of ponds 815
Fenvalerate, drift during orchard application 829
Fluoride, in tap and groundwater, Japan 677

Glutathione S-transferases, heavy metal effects 618

Heavy metal, accumulation in lambs and sheep near smelting area 887
Cd and Hg inhibition of cell migration 230
Cd effect on photosynthesis and electron transport 146
Cd induced lipid peroxidation, rat 929
Cd in shorebirds and prey near copper mine 242
Cd sulfate neurobehavioral toxicity 727
concentration in Ephemeroptera larvae 901
glutathione syn. in Hg resistant bacteria 336
hexavalent Cr and hematology 761
Hg and O_2 consumption and ion levels, mussel 913
Hg near industry 74
impact on Arctic Rhizobium 450
influence on glutathione S-transferases 618
in wild rats and birds, Nigeria 79
methyl Hg and cholinesterase, monkeys 769
methyl Hg transfer to hens' eggs 128
methyl Hg uptake in neonatal tissue 255
Mn physiological and behavioral changes, mice 921
organotin effect on thymus 100
Pd and Cd dietary intake, Spain 320
soil, produce near smelter, Canada 790
starvation and trace metals in mussel 473
street soil lead contamination, Kenya 782
toxicity of metals to tubificid worm 906
$ZnCl_2$ and increased metallothionein 249
Hexazinone, growth response of algae 223
movement in waste site 284
Hexobarbital, effect of nitrogen compounds on sleep 108
Honeybee, carbaryl in 654
Human, arsenic metabolism and speciation 53
chlordane, oxychlordane, nonachlor in blood 670
chlorpyrifos in house air and soil 686
corn worker chlorpyrifos exposure 343
dermatitis from contaminated slip 69
exposure to solvent vapors 1
lymphoblastoid sensitivity to nitroquindine oxide 62
methods for surface pesticide residues 397
OP applicator cholinesterase and lipoprotein 351
organochlorine and PCB in milk and serum 797
organochlorine in adipose tissue and blood 662
organochlorine pesticides in cow's milk 527
organochlorines in serum and whole blood 803
PCBs in auto parts and fluff 681
pesticide penetration of fabric 45
pesticide transmission in clothing 697
Hydrogen peroxide, Fe-mediation of SOS response 613

Iron, Cd interaction in intestinal tract 263
induction of SOS response 613

Kelthane, G-6-P dehydrogenase in prawn 738

Lead, bioavailability from encapsulated pigments 271
dietary intake, Spain 320
effect on fish, O. hornorum 237
exposure and Cu and Zn sequestration 894
peripheral blood effects in Barbus spp. 606
soil, produce near smelter, Canada 790
street soil contamination, Kenya 782
Lindane, effect on crab development 185
inhibitory effect on dehydrotestosterone receptor, rat 92
pollution near industry, Spain 9
toxicity to calves 756
Linuron, adsorption and desorption, charcoal 37

Manganese, impact on Arctic Rhizobium 450
physiological and behavioral effects, mice 921
Mercury, glutathione syn. in resistant bacteria 336
inhibition of cell migration 230
in soil and sediment near industry 74
toxicity based on O_2 consumption and ion levels 913
volatilization, utilization by Bacillus pasteurii 591
Methiocarb, effect on wood mice populations 84
Methylmercury, effect on cholinesterase, monkeys 769
tissue uptake in neonatal rat 255
transfer to hens' eggs 128
Microtox, toluenes and anilines toxicity test 550
Molluscicide, methiocarb effect on wood mice populations 84
Mutagen, assays of landfill leachate 561
polluted water and S. cerevisiae 203

Naphthoflavone, + surfactant biochemical effects 120
Neutral red, uptake bioassay for fish mortality 649
Nickel, sediment distribution, Veracruz, Mexico 774
Nicotine, toxicity to trout 173
Nitrile, glutathione and cyanide production 431
4-Nitroquinoline 1-oxide sensitivity of lymphoblastoid cells 62
Nonachlor, in human blood 670
Nucleoside, in blood of fish with tumors 713

Oil, effects of crude oil on murres 216
fossil fuel toxicity to trout 173
petroleum distribution, Veracruz, Mexico 774
Organochlorine, in cow's milk, Spain 527
Organochlorine, in human fat and blood 662
in human serum and whole blood 803
insecticides in martens and fishers, Canada 368
in game-ranched bison 300
Organophosphate, applicator cholinesterase and lipoprotein 351
Oxamyl, drift during orchard application 829
Oxychlordane, in human blood 670
Oxyfluorfen, disappearance from onions and soil 485

PAH, toxicity to trout 173
in atmosphere, Mexico City 690
Paraquat, effect on fish, O. hornorum 237
Parathion, acute toxicity to crab 576
salinity and toxicity to crab 569
PCB, accumulation factors 276
in auto parts and fluff 681
in human milk and serum 797
in martens and fishers, Canada 368
metabolism of Aroclor 1016 by microsomes 436
planarian neurobehavioral bioassay 866
superoxide degradation at low temperature 292
toxicity to C. magna & P. promelas 208
transfer to young fish 745
PCP, toxicity change with pH and temperature 197
Phenobarbital, + surfactant biochemical effects 120
Phenol, planarian neurobehavioral bioassay 866
Phthalate, effect on locomotor activity 159
Picloram, extraction from surface wipes 392
Potassium dichromate, Ca, Mg, So_4 effect on toxicity 461
Propargite, dislodgeable residues on nectarine foliage 507
Protective clothing, penetration of EC formulations 45

Retinoic acid, synergism, antagonism with carrier solvents 625

Tin, organotin effect on thymus 100
Tolylfluanid, fate on/in pears 499
Trace elements, in wild rats and birds 79
Trichlorfon, effect on ammonia metabolism 731
interaction with Chlorophyceae 599
Trichloroethylene, and lipid peroxidation induction 417
Trifluralin, enzyme-linked immunosorbent assay 404
Trihalomethane, in Saudi Arabian drinking water 305
Tubificid, toxicity of metals 906
2,4-D toxicity to crab 576

Vanadium, sediment distribution, Veracruz, Mexico 774
Vomitoxin, toxicity to chickens 410

Water, acute toxicity of organics to trout 173
altered genetics by polluted water 203
antibiotic production by marine algae 329
atrazine and hexazinone effect on algae 223
atrazine persistence in soil 22
bioassay for pollution control 387
bioconcentration of endosulfan 151
blood levels vs. water levels 554
BTX transport in groundwater 534
chlorothalonil use on ponds 822
Cu(II) uptake by Lemna spp. 466
crude oil effects on murres 216
DDT in Mytilus edulis 179
fenitrothion contamination of ponds 815
fluoride in tap and groundwater, Japan 677
mutagenicity of leachate 561

Water, nanoflagellate toxicity assay 193
neutral red uptake bioassay 649
parathion toxicity and salinity 569
PCB accumulation factors 276
PCB toxicity to D. magna and P. promelas 208
pesticide extraction from leachate 512
phthalate effect on locomotor activity 159
potassium dichromate toxicity, Daphnia similis 461
standard test fish, India 871
starvation and trace metal levels in mussel 473
ultraweak luminescence induced by chemicals 456
zebra fish vs. trout for toxicity 641

Zinc, sequestration after Pb exposure 894
uptake by Halimione portulacoides 442
$ZnCl_2$ and increased metallothionein 249
